

Seima Rimless ^{TRUE} Clean Flush™

**Rimless design
for a powerful
flush**

**Ultra smooth
surface, easy
to clean and
green**

**Antibacterial
for superior
hygiene**

The three
elements
of a
**TRUE
clean
flush**

Finally someone sat down and thought about the toilet.

There is nothing that can't be improved with innovative thinking. Seima applied this theory to the most 'utility' object in the home. And the result flows with state-of-the-art function.

Rimless design for a powerful flush.

To begin with we removed the flushing edge, creating the Seima Rimless™ pan. Grime and bacteria have nowhere to hide. The more powerful flush is precise and splash free. It efficiently washes the complete pan and uses less water. Waste is propelled away in a single flush.

Aesthetics has not been overlooked. Inside the rimless bowl, Seima has taken care to create a streamlined minimalist bowl design that is free of unsightly folds and dimples. Take a look!

Ultra smooth, antibacterial Seima NanoGlaze™ surface.

What's more, we wrapped the whole toilet in Seima NanoGlaze™ — a coating six times smoother than ordinary glaze, baked into the ceramic surface.

The ultra-smooth surface resists grime and bacteria, keeping the toilet cleaner and making it easier to clean.

Seima NanoGlaze™ contains a Silver/Zinc compound that actively reduces harmful bacteria such as Staphylococcus Aureus and Escherichia Coli (E Coli) by over 95%.

**These are the most efficient, hygienic and
easy-to-clean toilets available.**
